

Association of Revolutionary Turners

1/21/2010 Meeting - Agenda

<http://www.revolutionary-turners.com/>

7:00 P.M. - Welcome & Visitors/Mentors:

Currently ART has 10 members who volunteer as Mentors. For simply a modest amount of appreciation, they'll come to you or have you over to help you work on techniques or a project. Please see the website for their contact information.

Demonstration

Jacques Vesery Demo Day Agenda

I will start with a presentation which will include work from several series including; Classic forms, Seaforms, Pleiades Series and collaborations which help explanations throughout the day. I will need a lcd projector if possible... this is a short image presentation

“ Creating a Canvas of Good Form” my woodturning methods and processes

The process for creating a form to carve or texture including hollowing techniques and making sculptural forms as well. Methods of grinding, microwave drying, sculpting and re-turning steps will also be discussed... this will take up most of the morning session.

a half hour prior to lunch break I will do a presentation

"Concepts in Design"

This lecture is a quick in-depth comparison of design components before and after turning, including form, balance, and proportions. Through a presentation of several artists' work, we will learn how variations and growth help a body of work evolve. This is a great learning tool for anyone, working in any medium. It is also an ever changing presentation as new artists' work is added to the mix each year.

After Lunch

“Texture and Color Becomes Second Nature” Jacques' carving/texturing and coloring techniques

Using the turned form as a canvas, various carving and texturing techniques on both green and dry vessels. The use of power carvers, rotary carvers, burning tools and methods to enhance the details with color to create illusion . If there is time at the end we will go into gold leaf techniques I use [this is very time consuming , but we will cover what we can]

HANDS ON DAY LIMITED TO 8.
